

COSFORD RURAL DISTRICT COUNCIL.

WEST SUFFOLK.

REPORT

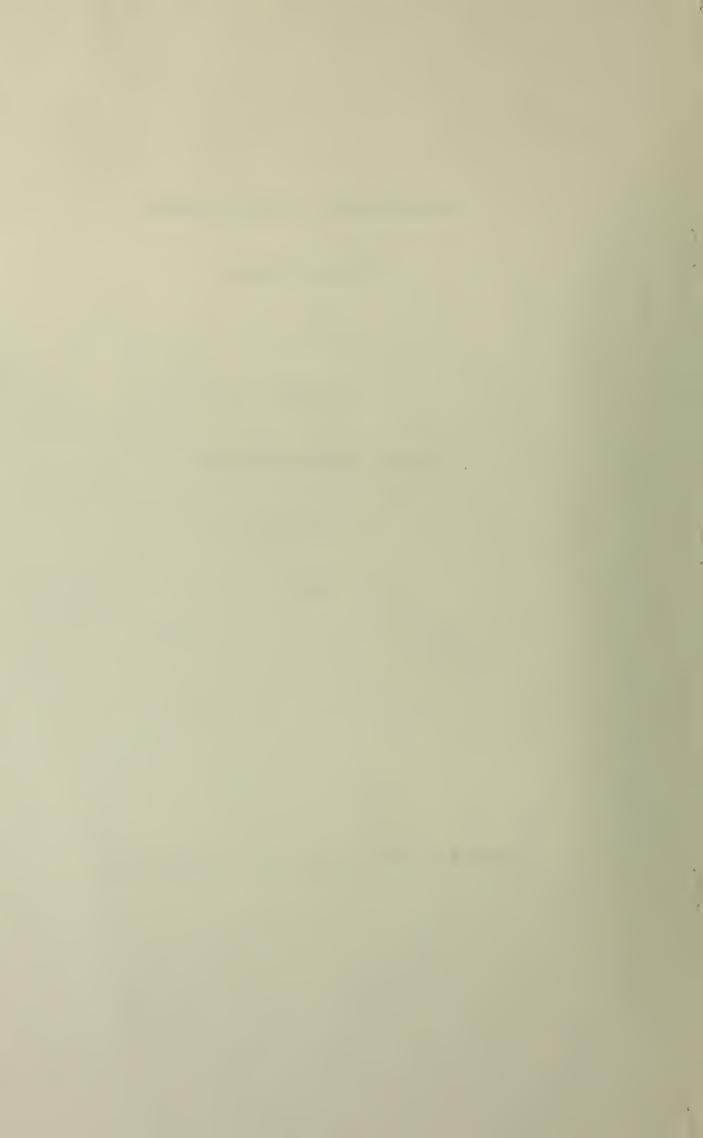

of the

MEDICAL OFFICER OF HEALTH

for the year

1954。

ROBERT H. CLAYTON, M.B., B.S., B.Hy., D.P.H.

ANNUAL REPORT

Medical Officer of Health for the Rural District of Cosford in the County of West Suffolk for the year ending 31st December, 1954.

Public Health Offices, 8, Whiting Street, Bury St. Edmunds.

October 1955.

To:-

The Chairman and Members of the Rural District Council.of Cosford.

Mr. Chairman, Ladies & Gentlemen,

Herewith I beg to submit for your favourable consideration my nineteenth Annual Report as Medical Officer of Health, being that for the year ended 31st December, 1954, and acknowledge my indebtedness to Mr. Hine in its compilation, as also to Mr. Durrant, Clerk of the Council.

I am, Mr. Chairman, Ladies & Gentlemen,

Your obedient servant,

ROBERT H. CLAYTON.

M.B., B.S., B.Hy., D.P.H. Medical Officer of Health.

Public Health Officers of the Authority.

(a) Medical. One part-time Medical Officer of Health,

Robert H. Clayton, M.B., B.S., B.Hy., D.P.H. (Durham). Ccrt. Mental Deficiency and Allied Subjects (London), appointed 1st February, 1937.

This Officer does not engage in private practice but holds in addition the following appointments: -- Medical Officer of Health

Nowmarket U.D.C.
Mildenhall R.D.C.
Thingoe R.D.C.
Thedwastre R.D.C.

Appointed 1st July, 1936.

Appointed 1st July, 1938.

(b) Others. One Sanitary Inspector,

G. H. Hine, T.I.MUNE, M.S.I.A., Meat & Other Foods Certificate R.S.I. Appointed 1st May, 1947.

Mr. Hine is also Surveyor to the Council,

One Additional Sanitary Inspector,

E. A. Panks, M.S.I.A., Meat & Other Foods Certificate R.S.I., M.Inst. Housing. Appointed 17th July, 1947.

Public Health Committee.

Col. Sir Charles Rowley, Bart. - Chairman. Dr. H. A. Mahony - Vice-Chairman.

Miss I. O. C. Baldry.
Revd. H. C. Butler.
It Gen Sin Harold Commings.

Lt.Gen.Sir Harold Carrington. Mr. I. J. Cooper.

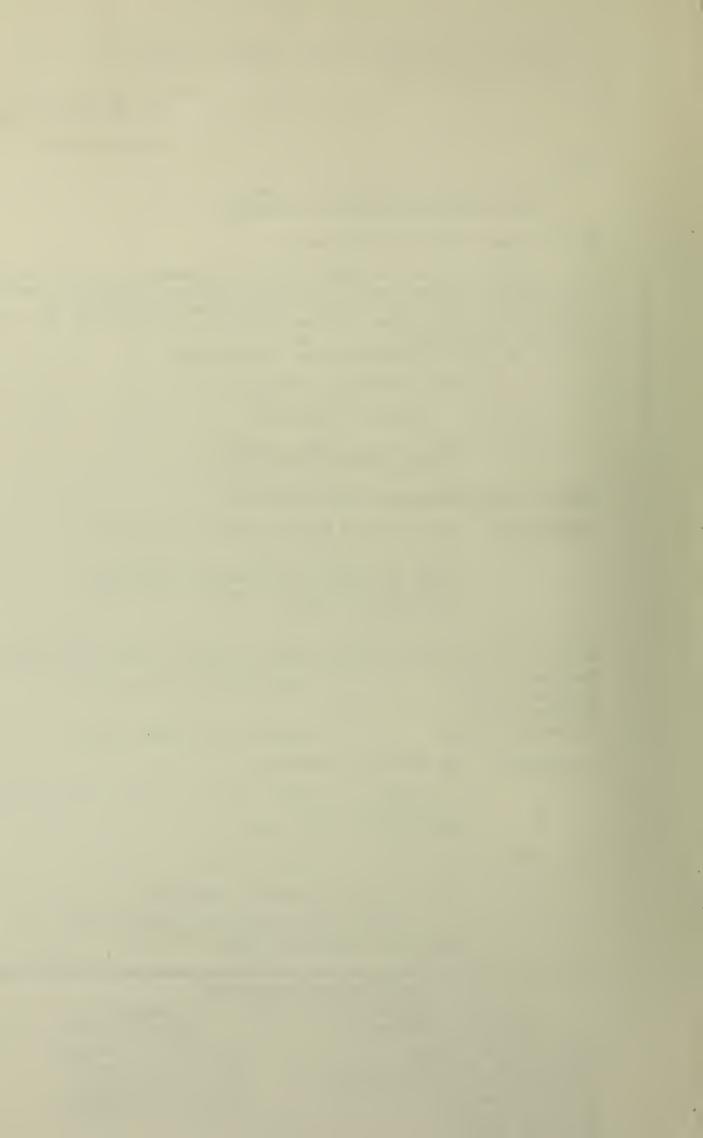

Mr. T. C. Dawson. Mr. H. P. Knott.

Mr. F. G. W. Letts.
Mr. W. J. Limmer.
Mr. A. Nicholson.
Mr. J. P. Presbury.
Mr. F. E. Woodgate.

Mr. r. E. Woodgave

Mr. T. C. Clarke, J.P., Chairman of the Council. Mr. C. A. Durrant, Clerk of the Council.

The eight deaths of infants under one year of age were all of legitimate children - all of these deaths were in the first four weeks of life) (mave one female):-

Male, 4 hours. Tentorial Lacerations, Persistent Occipital Posterior. Male, 2 hours. Prematurity.

" 14 " "

" 1 day. "Female, 4 hours."

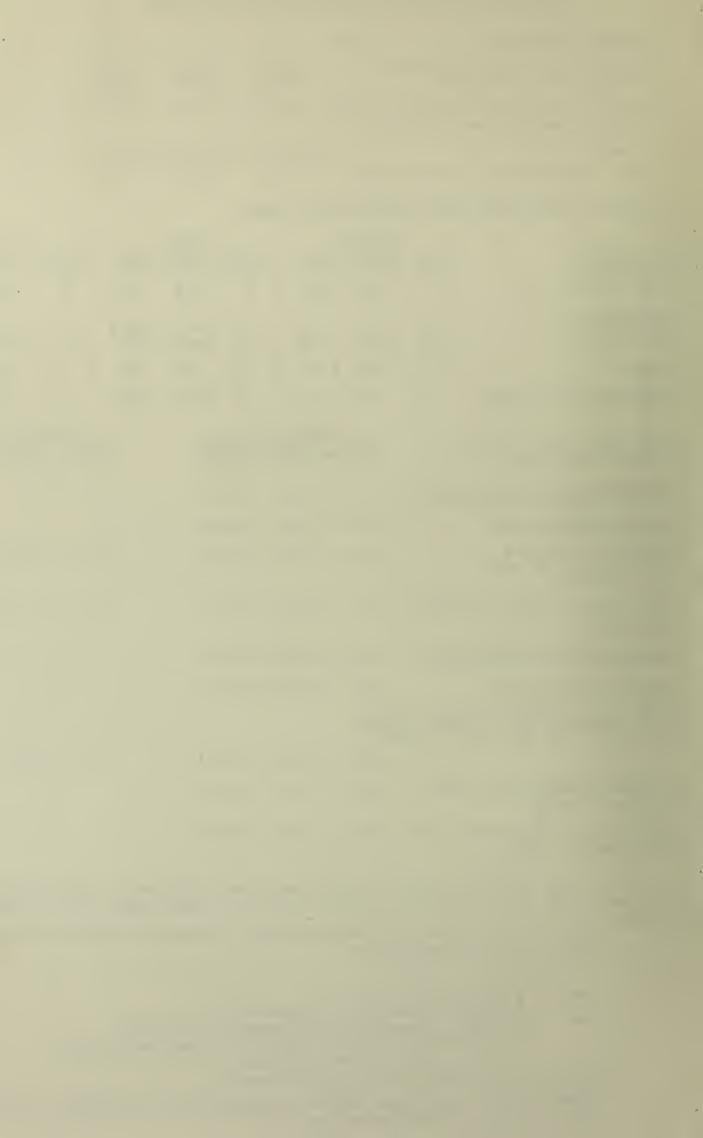

1 day. Prematurity. Atelectasis.

" 13 days. Congenital Malformation of Heart.

7 months. (a) Superior sagittal sinus thrombosis (b) Gastro-enteritis.

The only other deaths in the nonage were :-

Male, 20 yrs. Fractured Skull. Accidental fall from motor cycle. Female 2 yrs. Dermatomyositis,

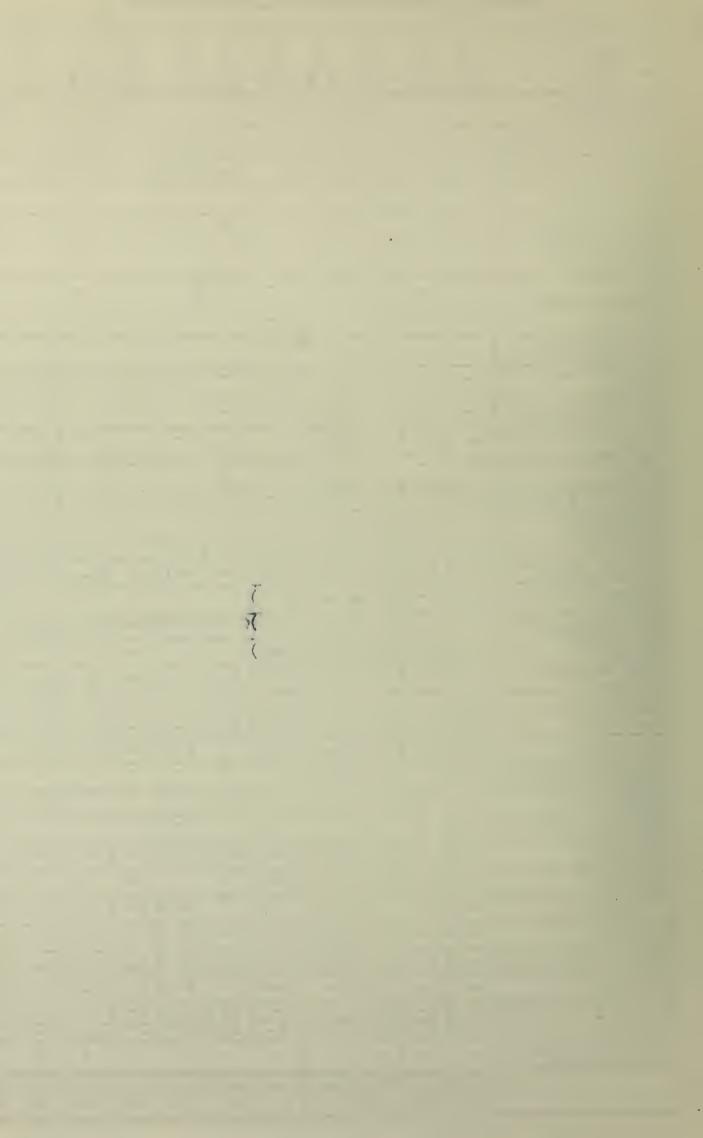

The following table gives the causes and the number of deaths occurring at the various age groups. The totals correspond with the Registrar General's figures.

As in last year's report the deaths have been classified to conform with implementation of the World Health Organisation Nomenclature Regulations, 1948 - these regulations being set out on pages 371-376 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948.

SECTION B. GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

(a) LABORATORY FACILITIES. The Emergency Public Health Laboratory Service provides the District with an excellent bacteriological service - for some parts of the District it is more convenient to use the Ipswich Laboratory, under the directorship of Dr. P. Martin, for the rest of the District the Laboratory at Cambridge, under the directorship of Dr. R. M. Fry, is preferable. Both Dr. Martin and Dr. Fry have proved most ready to discuss and advise on any epidemiological or similar problem.

Chemical analyses are carried out by Dr. S. Greenburgh, Public Analyst, Tenison Road, Cambridge, who also gives an efficient and helpful service.

- (b) AMBULANCE FACILITIES. These services since July 1953 have been provided directly by the County Council under the direction of Dr. D. A. McCracken, the County Medical Officer of Health.
- (c) NURSING IN THE HOME. The West Suffolk County Council District Nurse Midwives carry out these duties.
- (d) <u>CLINICS AND TREATMENT CENTRES</u>. These are not the responsibility of the Rural District Council.
- (e) <u>HOSPITALS</u>. The use of hospitals by Cosford residents is indicated by the following information with regard to live births and deaths:-
- 70 (52,) of the 134 live births took place at the resident's home in our District.

Of the 121 deaths, 73 (60%) occurred at the resident's own home in the Cosford District. Of the remaining 48, there were 45 in hospitals, as under:-

5 Bury St. Edmunds, (St. Mary's Hospital)
7 " " , (West Suffolk Hospital)
1 Edmonton (North Middlesex Hospital)
6 Ipswich, (Borough General Hospital)
5 " , (East Suffolk Hospital)
2 " , (St. Helw's Hospital)
2 Sudbury, (St. Leonard's Hospital)
17 " , (Walnuttree Hospital)

SECTION C. SANITARY CIRCUNSTANCES OF THE AREA.

1. (i) WATER. At the end of 1954 the parishes of Aldham, Groton and Milden were still without a piped water supply. Small installations were in use in the following parishes:-

Boxford - supplied from the Boxford Bore.

Edwardstone - parts supplied from the Boxford Bore and the council house site by the bore there.

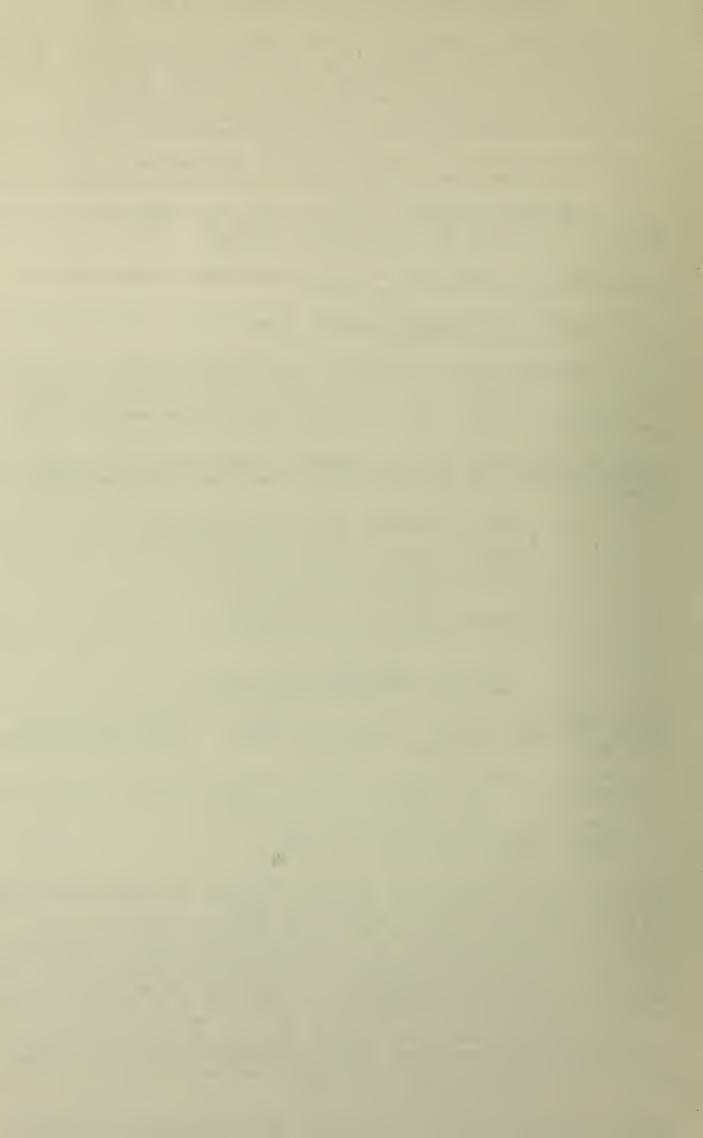

Elmsett - The Council-house site bore. Lindsey - Small public bore and tank. Whatfield - Small public bore and tabk.

Kersey, although supplied for the most part from the Comprehensive Scheme still made use of the council house site bore.

No start having been made on the Pumping Station at Semer for the Comprehensive Scheme, part of the parish of Kersey and the remaining 16 parishes in which already 58 miles of Comprehensive Scheme water-mains had been laid used water purchased in bulk from the Thingoe R.D.C. This amounted to 38,383,000 gallons during 1954, which is an average of 105,200 gallons per day throughout the year, but three times the amount of water was being purchased in Becember that was bought in January.

During 1954 the use of the Layham, Polstead, Nedging and Bildeston installation was discontinued as the Comprehensive Scheme had become available in these parishes - this change over was hastened by the break-down of the Nedging and Bildeston works.

The table on the following page indicates the number of houses in each parish which have a piped water supply. The numbers connected during each of the last five years are also indicated as is the number of houses within 200 feet of a standpipe and the number of additional metered supplies.

The additional metered supplies are to farm premises, dairies and business premises.

Leaks occurred in the 3" mains which have been in service for some time, but these were repaired without causing any major dislocation of the service.

One leak took place in the new mains, in the 7" pipes between Chelsworth and Bildeston, but this was also speedily repaired.

In December an undetected leak occurred in a neighbouring district, and this had the effect of draining the mains in three parishes in this District for one day; these three parishes have also been adversely affected from time to time by minor technical difficulties at the Thingoe R.D.C. water

In the severe weather in January, the pipes at the water tower on the Kersey Housing Site froze and could not be effectively cleared until the temperature rose.

In general the demand for water has been good in all the parishes through which the new mains have passed, and in some cases it has been exceptional.

During the year some 277 connections had been made affording a supply to a further 379 properties and also 73 more metered supplies.

Water Carting. No carting of water was necessary during the year.

Water Samples. Of 66 hacteriological samples taken from public supplies, 59 were reported as satisfactory. Of the 7 samples reported as unsatisfactory, 4 were from the small works at Aldham where the storage is a small tank at ground level - Comprehensive Scheme water is now available to all houses previously served from this source. The other 3 unsatisfactory samples were from different parts of the district and as follow-up samples were found to be satisfactory it is possible that some slight local

pollution of tap or washer caused the adverse reports.

Of 17 samples taken from private supplies, 10 were found to be unsatisfactory, and efforts were made to persuade the owners to improve the supply or alternatively to connect to the mains.

(ii) DRAINAGE AND SEWERAGE. The maintenance of the Council owned sewage works and plants is carried out by the Council employees under the direction of the Surveyor.

The following table indicates the number of houses in each parish which have modern drainage and are connected to sewage disposal plants. The numbers thus connected during each of the past four years are also indicated:-

M = Major Scheme.	Total Houses in Parish.	Houses sewag at 31.	ge	Conr	nected	durin:	<u></u>	Prior to

935 houses is 28% of the total number of houses in the District (3,329).

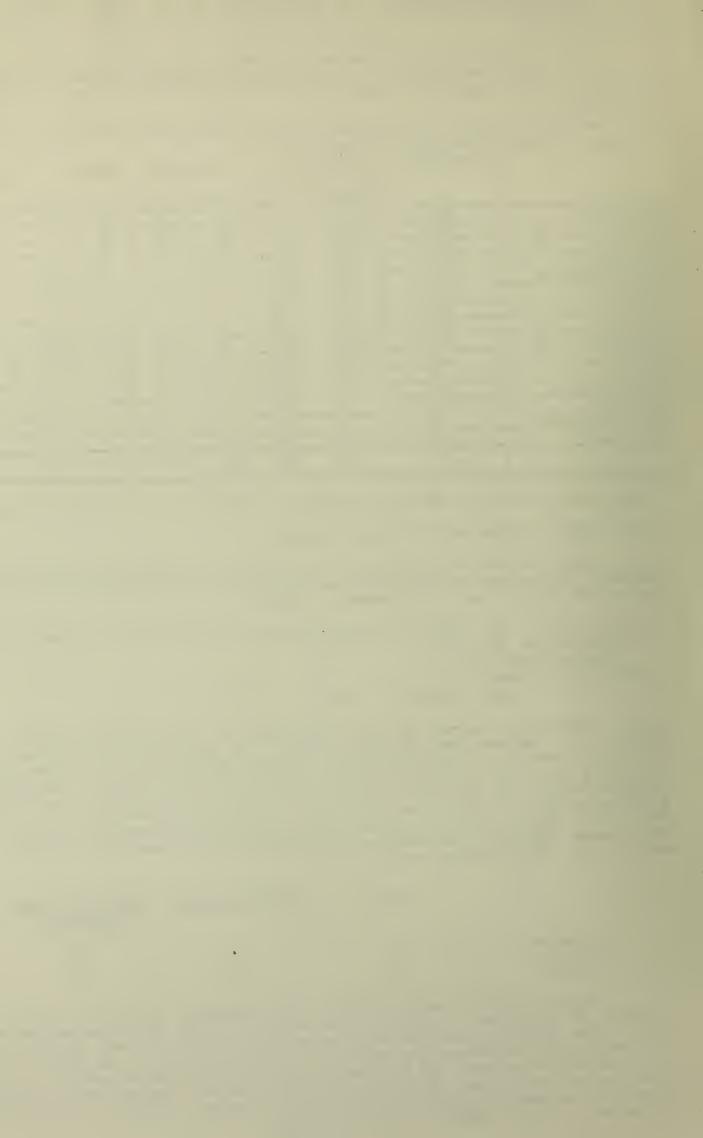

11 houses connected to Boxford Scheme.

The good use of the three major schemes is better indicated by comparing the number of dwellings on the route of the sewers with the number now making use of the sewers. Thus:-

These high percentages are attributed to the Council's policy to offer, for a limited time, a grant of half the cost, up to a maximum grant of £15, to carry out the conversion of earth closets to water closets. The grant was made available both for dwelling houses and for business premises. The time limit for Lavenham expired on 30th September, 1954. Business premises connected:Lavenham 18 of 24, Bildeston 14 of 15 & Boxford llof 15.19 sewage effluent samples were submitted for analysis by the Essex River Board Pollution Prevention and Fisheries Department from these three works with the following results:-

	Total.	Satisfactory.	Slightly below standard.
Lavenham	7	3	4
Bildeston	6	2	4
Boxford	6	4	2

That 10 samples were slightly below standard is related to the high standard of a maximum of thirty parts per million of suspended matter and also to the fact that the number of houses connected had not at that time been sufficient to ensure the volume of sewage approached the flow for which the works are designed. At the end of July 1955 the large party of Essex River Board Members and Officials who inspected the Boxford Works expressed themselves as very pleased with the design, layout, standard of maintenance and working of the sewage disposal plants.

In connection with these major schemes may be recorded that (a) sewers were extended during the year in Lavenham to provide facilities for drainage and conversion of earth closets to water closets to a group of Almshouses in Church Street and (b) at Bildeston it was necessary for the Council to issue a statutory notice which had the effect of abating a nuisance from inadequate drainage by having the dwelling connected to the sewer.

In connection with the minor sewage schemes during 1954:-

- (a) Whatfield. A new council housing site disposal works was constructed to deal with 8 post and 4 pre-war council houses and one licensed house, entailing provision of settlement tanks, ejector pumps, aeration filters and humus tanks.
- (b) Milden. A similar works to deal with 4 post and 2 pre-war council houses was provided.
- (c) <u>Cockfield</u>. In order to improve the quality of the effluent an extension to the Housing Site sewage disposal works was carried out inwolving the provision of an additional settlement tank, ejector pump, aeration filter and humus tank.
- (d) <u>Hitcham</u>. It was planned to extend the settlement tank to secure an improvement to the discharge from these works.
- (e) Polstead. Irrigation into the land was satisfactory for some years, but additional houses to serve made necessary the provision of an aeration filter and a humus tank.
- (f) Layham. The area used for land treatment of the effluent from the settlement tank is becoming sewage sick and with additional houses in course of construction it will soon be necessary to provide an aeration filter and humus tank.

The remaining minor schemes functioned reasonably satisfactorily although adjustments to restart the pumps were on occasion necessary at Brettenham and Elmsett.

De-sludging of these minor works is carried out with the Council's cosspool emptier.

2. RIVERS .ND STREAMS. With the completion of sewage schemes in the larger more built-up parishes of Lavenham, Bildeston and Boxford an important step has been taken to curtail the extensive pollution of the Rivers Brett and Box that previously took place.

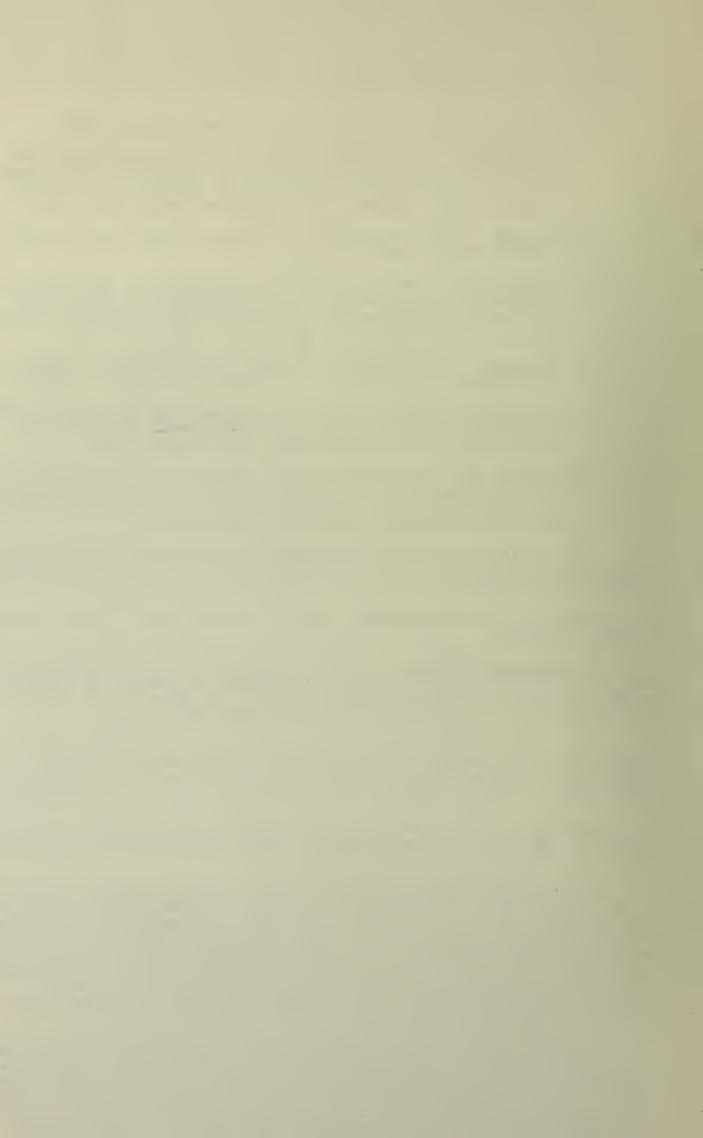

Some contamination of the River Brett and a tributary occurs at Monks Eleigh and Kersey, where the Council have instructed their Consulting Engineers to make a survey and report as to the possibilities and probable cost of sewering these parishes, as also of Chelsworth.

Extensions to the Housing Site Disposal works carried out during the year have been designed to give a better quality effluent discharging into the various streams and watercourses.

3. (i) CLOSET ACCOMMODATION. 152 conversions of earth closets to water closets have taken place during 1954. In the parishes of Lavenham and Bildeston 79% and in Boxford 72% of the dwellings on the route of the sewers have the amenity of a W.C. Financial assistance to encourage owners to carry out closet conversions continues in force in Boxford and Bildeston. The Council withdrew the assistance offered in Lavenham after 30th September, 1954. The Council authorised the issue of Statutory Notices requiring the provision of W.C's. to 14 dwellings in Lavenham. The owners have complied with 12 of these notices.

In the remainder of the district most working-class houses have pail closets. At the beginning of the year nightsoil collection was continued in the parishes of Lavenham, Boxford, Bildeston and Kersey. Due to the saving in the time taken to collect nightsoil in the parishes where closet conversions are taking place it has been possible to extend the service to give a weekly nightsoil collection to Groton, Monks Eleigh, Brettenham and Whatfield.

... 9 ...

The collection is carried out with a Dennis Cesspool Emptier which is employed for this purpose approximately 3 days per week. The remainder of the weck is spent in emptying private cesspools, cesspools at Council Housing Sites and de-sludging the several Council House sewage disposal plants.

The table below shows the number of cesspools emptied during the past 4 years:-

	1951.	1952.	<u>1953</u> .	1954.
Private cesspools within the Cosford Rural District.	1.35	122	159	161
Private Cesspools outside the Cosford Rural District.	15	13	7	12
Cesspools etc. in Cosford Rural District Housing Sites.	84	87	88	153
	234	222	254	326
		-		

In addition cosspools in the Hadleigh Urban District are emptied by our services.

(ii) <u>PUBLIC CLEANSING</u>. The 'kerbside' system of refuse collection was carried out during the year. The more built-up areas of Lavenham, Bildeston and Boxford have a weekly collection. A fortnightly collection takes place in the parishes of Aldham, Elmsett, Monks Eleigh, Brent Eleigh, Hitcham, Brettenham, Layham, and Polstead with a monthly collection in the remainder of the Rural District. It is more and more difficult to keep to the refuse collection schedule without overtime working by the refuse collection staff as parishioners place an increasing amount of refuse out for collection.

Three tips are in use at Monks Eleigh, Boxford and Semer. By using three tips, vehicle running expenses and time are saved, but there is the disadvantage that the tip attendant has a ran more difficult task to keep three pits under control rather than concentrating upon one only. Every effort is made to keep the tips controlled and all the pits are regularly treated to control fly and rodent infestations.

(iii) SANIFARY INSPECTION OF THE AREA. On the following page is a table supplied by Mr. Hine which records the number of inspections carried out by him and by Mr. Panks.

Want of Cleanliness(S.1)	3	3	Nil	Nil	Nil
Sanitary Conveniences (S.7) Unsuitable or defective	3	3	Nil	Nil	Nil

The number of Out-workers in the August list as required by Section 110 (1) (C) of Part VIII of the Act was one person working in a Council house making wearing apparel, M/C. Line No.13.

The 3 closet conversions which took place during the year at factory premises were encouraged by the Council's scheme of financial assistance which extends to the premises where the Council could statutorily require the provision of sanitary accommodation.

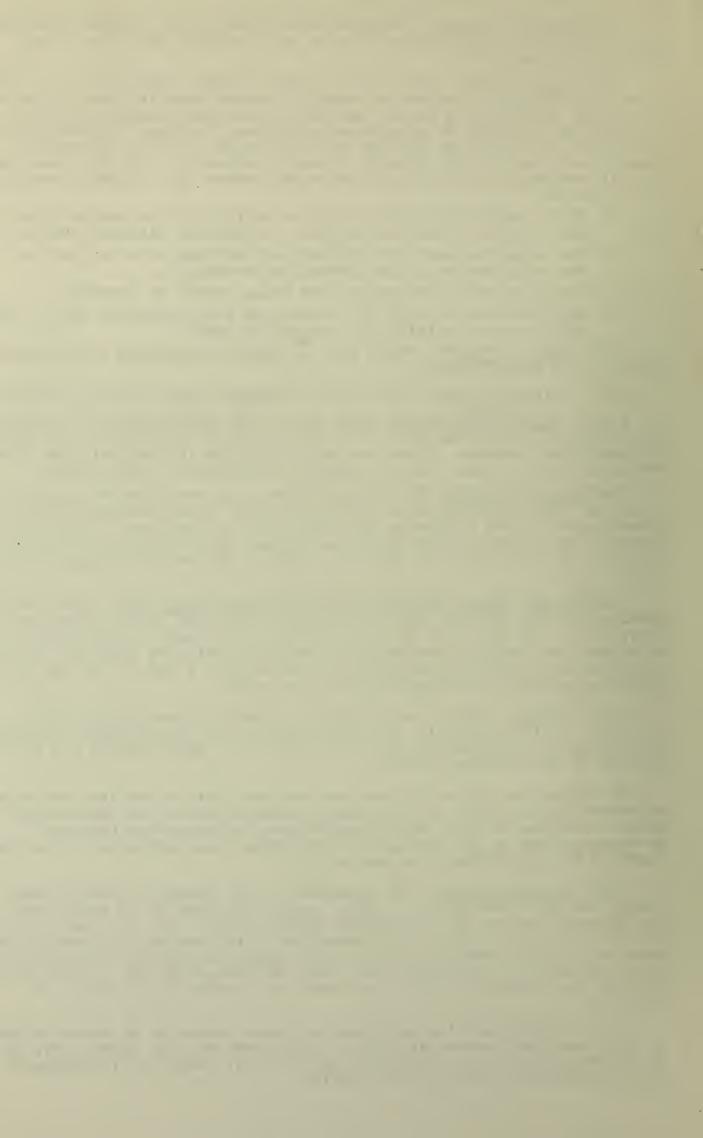

- (iv) SHOPS AND OFFICES. Improvements to shops and offices have taken place during the year particularly in the provision of drainage and sanitary accommodation.
- (v) CAMPING SITES. There is no regular camping site within the Rural District. Eighteen licences to occupy caravans were in force at the end of 1954. The caravans are mostly occupied by seasonal workers on farms or as an annex to a cottage to provide an additional bedroom. In Boxford an encampment of 5 families live on one site which has been approved by the Council and the Town and Country Planning Authority. In all cases where the Council authorise the issue of a caravan licence the following conditions are attached:-
 - (a) That a supply of wholesome water sufficient for the occupiers of the caravan be provided within a reasonable distance thereof.
 - (b) That adequate sanitary and drainage arrangements be provided to the satisfaction of the Council's Surveyor.
 - (c) That a suitable receptacle for house refuse be provided.
 - (d) That the site be kept in a clean and tidy condition and no other unauthorised buildings be erected thereon.
- (vi) SMOKE ABATEMENT. There were no cases of nuisance from excessive smoke in the Rural District.
 - (vii) SWIMMING BATHS. There are no swimming baths in the district.
- (viii) <u>ERADICATION OF BED BUGS</u>. No bed bug infestation was reported or discovered during the year. 5 cases of flea infestation were reported in non-council houses. These were very effectively dealt with by Council Officials using Messrs. Cooper McDougal & Robertson's Multispray.
- (ix) RODENT CONTROL. The regular survey and treatment of premises to eradicate rodent infestations was carried out during the year by Mr. R.W. Fenning, the Rodent Operator, under Mr. Hine's direction. Particular attention was given to the sewers and refuse tips under the control of the Council. On the following page is a summary of the Rodent Operator's work.
- (x) THE RAG FLOCK & OTHER FILLING MATERIALS ACT, 1951. There are no premises in the District which require registration or licensing under the above Act. The premises in the District which carry out upholstery work only carry out repair, re-making and reconditioning of articles and are therefore exempt from registration under Section 1 (2) (a) of the Act which is required for manufacture of new goods.
- (xi) <u>SCHOOLS</u>. There are 12 village schools in use in the Rural District. All the schools with the exception of Edwardstone were connected to a mains water supply at the end of 1954. (A mains supply has now been laid on to Edwardstone School).

The Education Authority have not yet been able to realise the hope expressed in the 1952 and 1953 Annual Reports that a W.C. conversion scheme would be arranged at Boxford School, a connection from the sewerage system to the school boundary having been provided by the Rural District Council towards the end of 1951.

(xii) <u>PUBLIC HOUSES</u>. The extension of the Council's water mains during the year has enabled a piped supply of water to be taken into six Licenced Houses in the district which formerly had to depend on well water of doubtful quality. Improvements to the sanitary accommodation have been carried out to public houses within the District. Extensive reconditioning of the Monks Eleigh Swan is proceeding and a start has been made on the construction of a new hotel to replace the Cock Inn at Lavenham.

The Brewery Companies are bringing their houses up to modern standards as main services become available; by the end of 1954 there were, of the 40 Licensed Premises in Cosford, 20 with W.C. connected to cesspools or main drainage and a main water supply.

PREVENTION OF DAMAGE BY PESTS ACT, 1949.

- 4. Housing Act, 1936 Part IV Overcrowding.
 - (a) (i) Number of dwellings overcrowded at the end of the year (ii) Number of families dwelling therein 1 (iii) Number of persons dwelling therein 7

1.

- (b) Number of new cases of overcrowding reported during the year
- (c) (i) Number of cases of overcrowding relieved during the year (ii) Number of persons concerned in such cases
- (d) Particulars of any cases in which dwellinghouses have again Nil become overcrowded after the Local Authority haveing taken steps for the abatement of overcrowding.

The Registrar-General's estimate of the resident population in 1954 was 9,470 persons - the number of inhabited houses at the end of the year according to the Rate Book was 3,329 - an average of 2.84 persons per house throughout the District.

The Council's 1954 contribution to the housing needs of the District falls under five heads - the provision of new houses, grants for improvements, subsidies, loans for house purchase and sale of Council houses - in addition to the general repair and maintenance of existing houses.

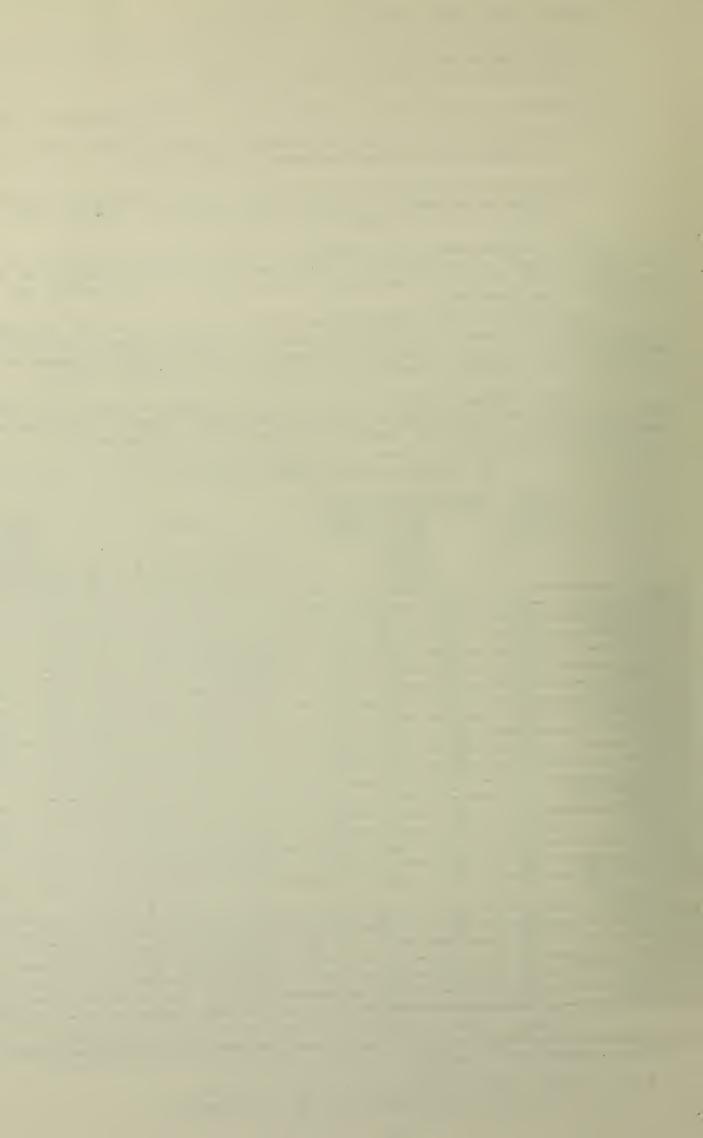

(a) New houses provided in the post-war years are listed in the following table - the parish and year in which the Council houses were built being indicated as also the number of pre-war council houses:-

		COUNCIL HOUSES BUILT IN PARISH

Private houses built post-war

^{92 13 18 15 8 8 10 7 10 3}

x 30 of these were prefabricated houses erected 8 at Bildeston, 8 at Boxford and 14 at Lavenham.

(b) Improvements Grants. The Council encourages applications for improvement Grants to assist in the improvement and reconditioning of dwellings within the Rural District. During 1954 the Council approved applications for Improvements in respect of a further 31 dwellings to an amount of £6,704. Since the coming into operation of the Housing Act,1949, until the end of 1954 the Council had authorised Improvement Grants amounting to £10,325 in respect of 47 dwellings.

The Council is also playing an active part in preserving and reconditioning suitable properties themselves. A terrace of 6 XVIIth century houses were purchased in Water Street, Lavenham and during 1954 a terrace of 2 bungalows and 2 houses were erected in surplus garden at the rear. Families will be transferred from the old cottages to the new, to facilitate the reconditioning of the old cottages to a scheme which has been approved by

the Ministry of Housing and Local Government.

The encouragement given by the Council to property owners to improve their cottages with the aid of improvement grants is raising the standards of comfort and amenity in dwellings throughout the district, and in some borderline cases the giving of a grant has brought a reconditioning scheme rather than the demolition of the cottage concerned. Each house saved in this way effects an economy in so far as the Council does not have to take agricultural land to provide a new site with provision of roads, sewers and water mains to provide a replacement house.

water mains to provide a replacement house.

The Council advanced loans under the provisions of the Housing Act, 1949, to finance closet conversion schemes in respect of 2 cottages at Boxford.

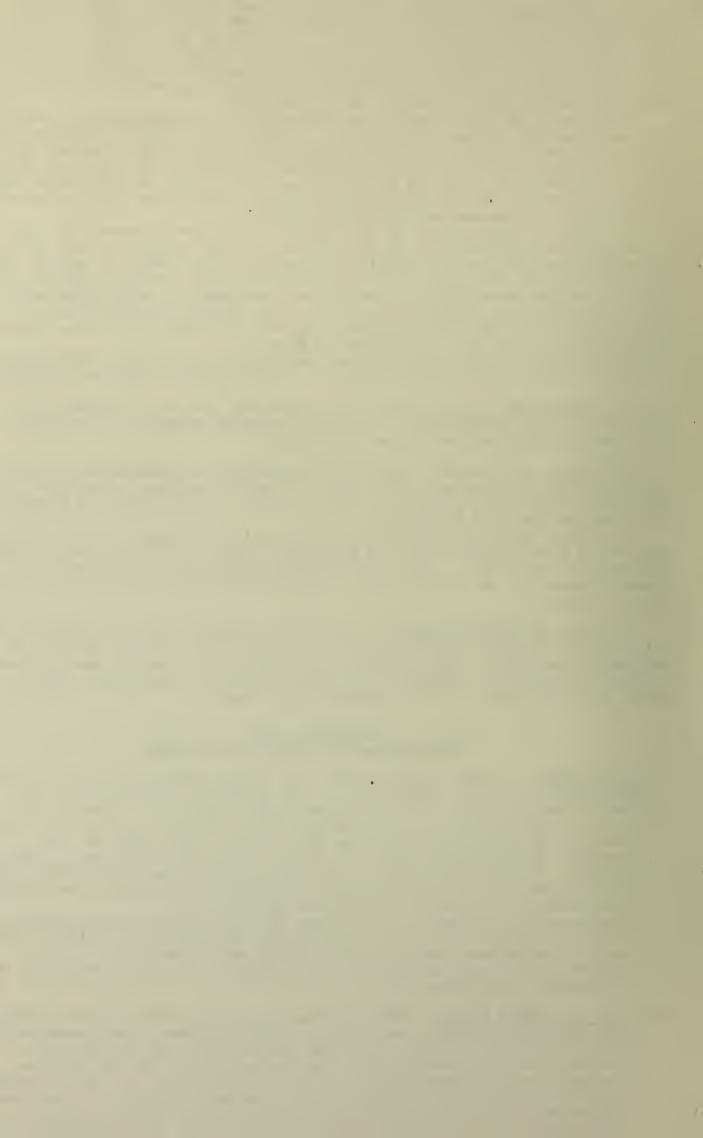

- (c) <u>Subsidies</u>. During 1954 a bungalow was erected at Hitcham for occupation by an agricultural worker and subsidy granted to the owner under the Housing Financial Provisions Act, 1938.
- (d) Loans. The Council approved loans under the provisions of the Small Dwellings Acquisition Act, 1899-1923, to enable persons to purchase, for their own occupation, existing houses (1 case in the parish of Kersey, 1 at Boxford and 2 at Lavenham).

Two loans were approved (both in the parish of Boxford) where the applicants constructed their own bungalows, the work being done in the applicant's spare time. As a result of this one applicant vacated a Council house and one had his name removed from the waiting list for a Council house.

(e) Sale of Council House. One pre-war Council house at Hitcham was sold to the occupier during 1954. The occupier thus became sure that his repayments would not vary (as often might his rent) and by freeing the Council of payment of annual rate contributions on this house allowed the money to be diverted to help another needy case.

SECTION E. INSPECTION AND SUPERVISION OF FOOD.

- (a) MILK SUPPLY. Almost all the milk sold within the District is either pasteurised or T.T. pasteurised. The principal dairy within the Rural District is situated at "Greenbank", Boxford. A very high quality pasteurised and tuberculin tested milk is supplied to a large part of the Rural District from this dairy. This milk is also supplied to consumers within the Rural Districts of Melford, Samford and Gipping, the Urban District of Hadleigh and the Borough of Sudbury. The results of the bacteriological analysis of samples of the milk have been very satisfactory throughout the year. Supplementary Licences are in force in this district authorising the Bury St. Edmunds, Ipswich and Stowmarket Co-operative Societies to retail pasteurised and T.T. milk within this district. Supervision of milk producers is now carried out by the Ministry of Agriculture and Fisheries.
- (b) MEAT AND OTHER FOODS. The war-time arrangements for central slaughtering came to an end on 29th June, 1954. Prior to this, joint consultation took place between the Council and the Sudbury and District Meat Retailers on the question of slaughtering facilities and the relicensing of slaughter houses. A sub-committee of the Health Committee inspected slaughtering premises and recommended that, after necessary improvements had been carried out licences to slaughter should be authorised at two slaughter houses in Bildeston, 1 at Cockfield and 1 at Boxford.

The majority of the 12 butchers in the District prefer to buy their meat from wholesalers rather than slaughter their own animals. The butchers shops in the District were all kept in a hygienic manner throughout the year.

The following table shows the number of animals slaughtered and inspected in the District for the six months from the end of rationing until the end of 1954.

	Cattle excluding Cows,	Cows.	Calves.	Sheep & Lambs.	Pigs.

20 retailers are registered for the storage and sale of pre-packed ice-cream. No ice-cream is sold from shops within the District other than that which has been pre-packed, neither is there a registered manufacturer of ice-cream in the District.

There are 39 general stores retailing provisions consumed within the Rural District. The general standard of hygiene is good- housewives demand better standards and this has the effect of encouraging shopkeepers to do their utmost to make their shops as attractive as possible.

There are 5 bakehouses situated in the Rural District. These were visited during the year and found to be satisfactory. It is pleasing to note that an increasing amount of bread is being delivered wrapped.

There are 3 greengrocers and 5 wet and fried fish shops within the District. Unfortunately used newspapers are still being used for wrapping up fried fish and chips.

Shopkeepers have co-operated well with the Health Department seeking advice on the condition and wholesomeness of foods when necessary and voluntarily surrendered food for condemnation at the request of the Sanitary Inspectors.

The following foodstuffs were Surrendered for condemnation during 1954:-

66 lbs, of cheese.
2 pts. (equivalent) Carnation condensed milk.
2 l4. oz tins of Golden Vein Milk.
2 pts. (equivalent) of Colleen evaporated Milk.
2 l\frac{3}{4} pts. (equivalent) Snowflake evaporated Milk.
1 llb. tin of crushed Pineapple pieces.
1 l2. oz. tin of Carnation Luncheon Meat.
1 l3. oz. tin of Pears.
1 l3. oz. tin of Pineapple Titbits.
49 7 oz. tins of Ye Olde Oak Luncheon Meat.

(c) ADULTERATION.
(d) CHEMICAL BACTERIOLOGICAL EXAMINATION.
(e) NUTRITION.
(f) SHELL-FISH.
(g) WATER-CRESS.

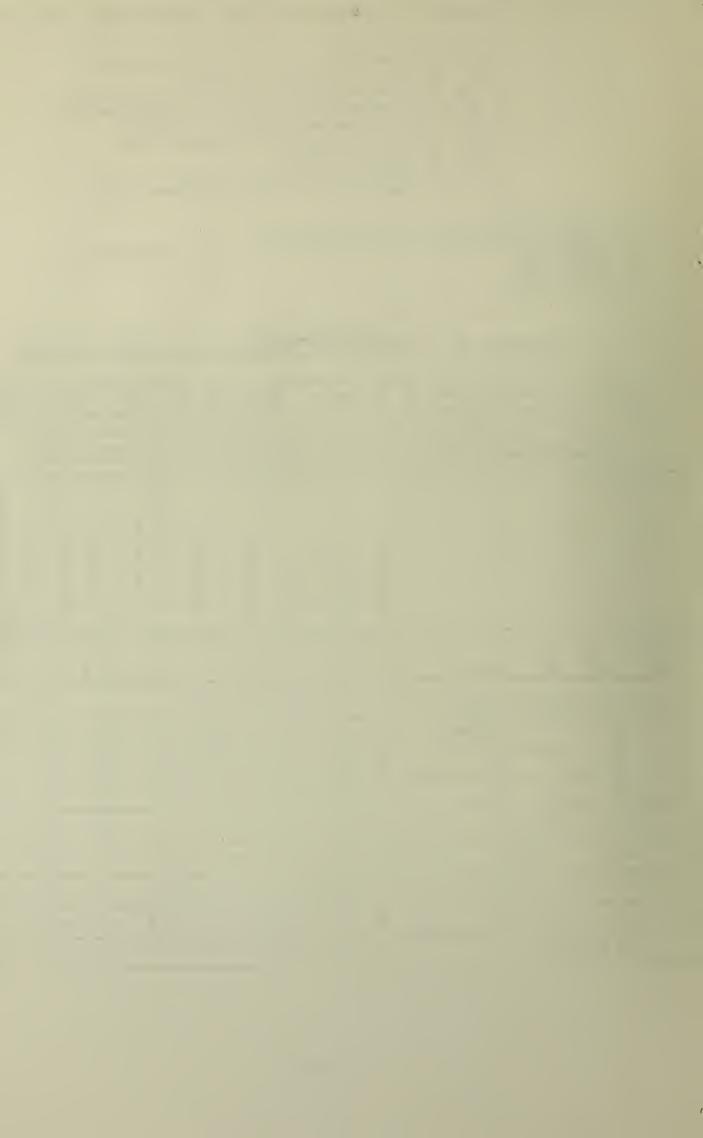

No change.

PREVENTION OF & CONTROL OVER INFECTIOUS AND OTHER DISEASES.

The following table shows the number of Infectious Diseases among the civilian population during the year. These are the final numbers after corrections subsequently made either by the Notifying Medical Practitioner or by the Medical Superintendent of the Infectious Disease Hospital.

ALL NOTIFIABLE DISEASES (other than Tuberculosis) DURING 1954.
